- Flutter Web

EDUCATION

Najot Ta'lim - Foundation

June 2021 - October 2021

In this course I learned C and Phyton programming languages. \nActivities and societies: Leetcode problems, algorithms and real projects.

Najot Ta'lim - Flutter Bootcamp

November 2021 - April 2022

I learned programming and mobile programming from scratch and less backend programming. I participated in a real project with Flutter and got experience with clean code and high technology.

LANGUAGES

- **English** (elementary)
- **Russion** (basic)
- **Uzbek** (native)

WORK EXPERIENCE

Samuraidev.uz

Flutter developer - full time   1 year 8 months. April 2022 — October 2023

- I started as a junior developer at Samurai and worked my way up to mid-level flutter developer and mobile team lead. I am responsible for the full cycle of application development. I learned clean code architecture and its project usage.improved my hard and soft skills with experienced developers, pm and designers.
- I wrote international projects in the Flutter programming language for Android and iOS devices and released them to the App Store and Play market.
- I completed some of the projects written by foreign programmers, updating them to clean and high-quality code.
- I became the team leader of the mobile team. I have provided solutions for bugs and updates that may occur in a team environment.

CaptureMe (client and photographer apps) you can hire photographer and work as photographer

TTA - Tashkent Medical academy

Flutter Web developer - Part-time

Jul 2023 - until now

- I wrote 2 high-quality and responsive websites with flutter code. An online registration platform for students of the Tashkent Medical Academy to live in the dormitory of the academy and an Admin site for monitoring.
- I worked on the problems and updates that arose in this project.
- More than 4,000 students of the Tashkent Medical Academy are using this platform to book accommodation and make payments.
- More than 20 employees are using the admin website to track requests.
